## White Bird

This bird has a wide, shovel-shaped beak.

Coordinates: 32.735158 degrees N , 117.151600 degrees W

Elevation: 143.0 m above Sea Level

Date-Time: 2019/10/08, 23:10:34 UST

*Figure 1: Image of White Bird*

# Cheetah

Located next to the Rhino, this feline normally has a dog companion, but not today.

Coordinates: 32.737358 degrees N , 117.150758 degrees W

Elevation: 49.0 m above Sea Level

Date-Time: 2019/10/15, 16:15:29 UST

*Figure 2: Image of Cheetah*

## Meerkats

At the north end of Africa Rocks, these prolific diggers have an enclosure full of holes and devoid of plants.

Coordinates: 32.739247 degrees N , 117.150572 degrees W

Elevation: 52.0 m above Sea Level

Date-Time: 2019/10/15, 16:24:45 UST

*Figure 3: Image of Meerkats*

## Camel

The camels are located between the elephants and the donkeys.

Coordinates: 32.738803 degrees N , 117.151878 degrees W

Elevation: 45.0 m above Sea Level

Date-Time: 2019/10/15, 16:28:58 UST

*Figure 4: Image of Camel*

## Tiger

Tigers are located along the Tiger Trail on the southern edge of the Zoo.

Coordinates: 32.733858 degrees N , 117.151483 degrees W

ELEVATION ERROR

Date-Time: 2019/10/15, 17:00:14 UST

*Figure 5: Image of Tiger*

## Flamingoes' Gathering

These birds are near the main entrance to the Zoo and their enclosure often produces a pungent odor.

Coordinates: 32.735175 degrees N , 117.149942 degrees W

Elevation: 76.0 m above Sea Level

Date-Time: 2019/10/15, 17:09:55 UST

*Figure 6: Image of Flamingoes' Gathering*

## Bonobos

These primates are a type of chimpanzee and are known for making love, not war.

Coordinates: 32.734319 degrees N , 117.151861 degrees W

Elevation: 34.0 m above Sea Level

Date-Time: 2019/10/15, 17:20:51 UST

*Figure 7: Image of Bonobos*

## Grizzly Bear

This bear, represented on California's flag, is no longer found in this State (outside of zoos).

Coordinates: 32.736433 degrees N , 117.149781 degrees W

Elevation: 74.0 m above Sea Level

Date-Time: 2019/10/15, 17:28:44 UST

*Figure 8: Image of Grizzly Bear*

## 2 Birds

These water birds are located inside Scripps Aviary.

Coordinates: 32.735158 degrees N , 117.151600 degrees W

Elevation: 143.0 m above Sea Level

Date-Time: 2019/10/08, 23:10:34 UST

*Figure 9: Image of 2 Birds*

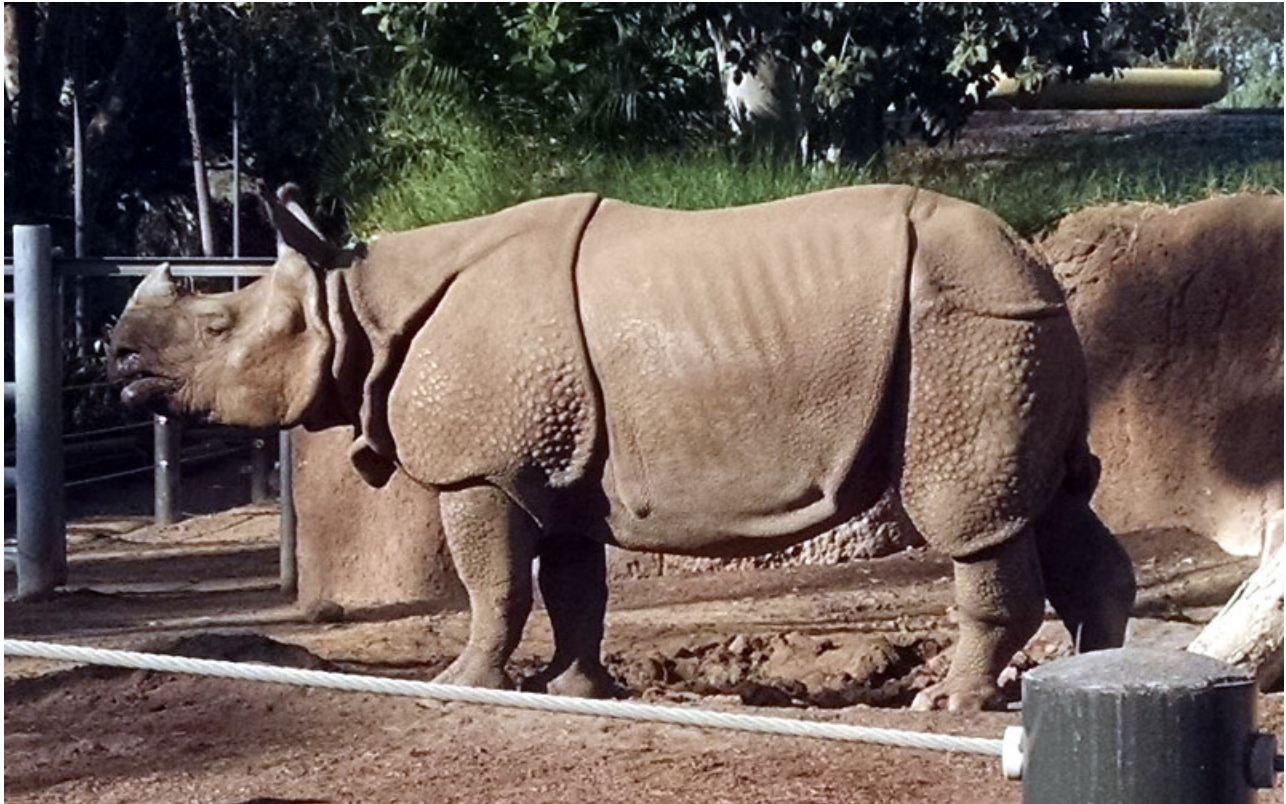

## Rhinoceros

The rhinoceros (a.k.a. rhino) enclosure is located between those of the cheetah and the giraffes.

Coordinates: 32.737133 degrees N , 117.150225 degrees W

Elevation: 63.0 m above Sea Level

Date-Time: 2019/10/15, 16:17:40 UST

*Figure 10: Image of Rhinoceros*

# Elephant

Elephants and their enclosures take up a lot of space at the Zoo.

Coordinates: 32.738186 degrees N , 117.152219 degrees W

Elevation: 48.0 m above Sea Level

Date-Time: 2019/10/15, 16:30:11 UST

*Figure 11: Image of Elephant*

## Guanaco

A relative of the Llama, the Guanaco is its wild cousin.

Coordinates: 32.736494 degrees N , 117.153461 degrees W

Elevation: 29.0 m above Sea Level

Date-Time: 2019/10/15, 16:34:54 UST

*Figure 12: Image of Guanaco*

## Spotted Leopard

This leopard was pacing the entire time I watched it.

Coordinates: 32.736200 degrees N , 117.153236 degrees W

Elevation: 45.0 m above Sea Level

Date-Time: 2019/10/15, 16:36:36 UST

*Figure 13: Image of Spotted Leopard*

## Polar Bear

This big guy looks awkward in the water but is a proficient swimmer.

Coordinates: 32.734394 degrees N , 117.154906 degrees W

Elevation: 38.0 m above Sea Level

Date-Time: 2019/10/15, 16:44:59 UST

*Figure 14: Image of Polar Bear*
